

# LIQUIFLEX® AMPRIMA®

A more efficient, recycle-ready bulk packaging solution for foodservice:

Meet Amcor LIQUIFLEX® AMPRIMA®—our latest flexible packaging innovation, engineered to help foodservice brands move away from bulky rigid containers.

This robust mono-material film offers a cost-effective, lighter-weight, and safer alternative to pails, cans, and jars—delivering sustainability gains without compromising product protection.

## Streamline & protect: The advantages

### Recycle-ready by design

Mono-material polyethylene structure, recyclable where collection and recycling streams exist, helping reduce your environmental footprint.

### Cut costs & complexity

Lower weight and volume translate into reduced transportation costs, fewer EPR fees and plastic taxes, and less storage space.

### Hygienic & hassle-free

Replaces small condiment sachets with a pump or a spout system, allowing safe, convenient dispensing for restaurants.

### Space-saving hero

Takes up only a fraction of the warehouse or transport space needed for pails or cans.

### Ready for ambient and hot fillings

Ideal for condiments, purees, soups, liquid eggs, and more—adaptable to multiple fill lines and foodservice applications.

### Future-proof your packaging

Addresses impending single-use sachet bans by allowing safe, convenient dispensing for quick-service restaurants.

## Circularity in action

### Mono-material construction

Compatible with polyethylene recycling streams in practice where available.

### Boosted with recycled content

Option to incorporate advanced recycled materials.

### Lower your carbon footprint

Lightweight, flexible packaging can help lower CO2 emissions by 79% from shipping and storage.

## Where LIQUIFLEX® AMPRIMA® shines

### Dairy & specialty:

Cheese blends, custards, smoothie mixes, and icings.

**Proteins:** Liquid eggs, marinated meats, cooked taco fillings, etc.

### Prepared foods:

Soups, purees, deli salads, pickled vegetables, and more.

### Condiments & sauces:

Ketchup, dressings, salsa, and other liquid or semi-liquid products.
